TWENTY-SEVENTH ANNUAL REPORT

OF THE

STATE BOARD OF EDUCATION

SHOWING THE CONDITION OF THE

Public Schools of Maryland,

FOR THE

Year Ending July 31st, 1893.

BALTIMORE:
KING BROTHERS, STATE PRINTERS.

1894.

STATE OF MARYLAND.

OFFICE OF THE STATE BOARD OF EDUCATION,

BALTIMORE, December 15, 1893.

TO HIS EXCELLENCY FRANK BROWN,

Governor of Maryland:

SIR—I have the honor to transmit to you the Annual Report of the State Board of Education for the fiscal and school year ending July 31, 1893, with accompanying documents, as required by law.

Very respectfully,

Your obedient servant,

E. B. PRETTYMAN,

Secretary.

REPORT

OF THE

State Board of Education.

The following summary, in connection with the accompanying tables, exhibits in a condensed form the most important facts connected with the administration of the public school system of the State for the fiscal and school year ending in the city of Baltimore, December 31, 1892, and in the counties, July 31, 1893.

The several items are compared with the corresponding items for 1891, in the city of Baltimore, and for 1892 in the counties:

Number of schools in Baltimore city	156	
" " " " the counties	2,156	
Total		2,312
Being an increase in 1893 of 49		
Number of different pupils, city	75,790	
" " " " counties	123,612	
Total		199,402
Being an increase in 1893 of 10,273		
Highest number enrolled in one term, city	54,406	
" " " " " counties	108,281	
Total		162,687
Being an increase in 1893 of 3,216		

Average number in daily attendance, city	43,869	
" " " " " counties	64,742	
Total		108,611
Being an increase in 1893 of 3,548		
Number of teachers, city	1,382	
" " " counties	2,827	
Total		4,209
Being an increase in 1893 of 158		
Number of months schools were open, city	10	
" " " " " " counties	88	
Average for the State		94
Same as in 1892.		
Receipts from all sources, city	$1,009,584 18	
" " " " counties	1,154,732 79	
Total		$2,164,316 97
Being an increase in 1893 of $189,426.16		
Amount paid for teachers' salaries, city	$818,269 85	
" " " " " counties	808,658 18	
Total		$1,626,928 03
Being an increase in 1893 of $46,516.74		
Amount paid for building, repairing and furnishing school houses, city	$195,384 30	
Amount paid for building, repairing and furnishing school houses, counties	89,752 50	
Total	$285,136 80	
Being an increase in 1893 of $27,737.22		
Amount paid for books and stationery, city	$53,606 08	
" " " " " " counties	48,627 32	
Total		$102,233 40
Being an increase in 1893 of $2,054.20		

Amount paid for rent, fuel and other incidentals, city	$109,364 14	
Amount paid for rent, fuel and other incidentals, counties	63,827 64	
Total		$173,191 78
Being an increase in 1893 of	$20,936.92	
Total expenses for public school purposes, city	$1,176,624 37	
Total expenses for public school purposes, counties	1,111,604 72	
Total		$2,288,229 09
Being an increase in 1893 of	$119,922 74	

Excluding the city of Baltimore, the county schools show the following results :

Number of schools	2,156	
Increase in 1893		41
Total number of scholars enrolled	123,612	
Increase in 1893		1,319
Highest number enrolled in one term	108,281	
Increase in 1893		1,353
Average number enrolled	97,022	
Increase in 1893		768
Average number in daily attendance	64,742	
Increase in 1893		2,577
Number of first grade	26,827	
Increase in 1893		449
Number in second grade	17,793	
Increase in 1893		150
Number in third grade	18,897	
Increase in 1893		220
Number in fourth grade	18,252	
Increase in 1893		253
Number in fifth grade	14,117	
Increase in 1893		151

Number in sixth grade	8,482	
Decrease in 1893		62
Number above sixth grade	3,946	
Increase in 1893		192
Number studying book-keeping	2,337	
Increase in 1893		15
Number studying algebra	5,600	
Increase in 1893		329
Number studying philosophy	3,302	
Decrease in 1893		114
Number studying drawing	28,080	
Decrease in 1893		323
Number studying geometry	2,422	
Decrease in 1893		298
Number studying physiology	17,254	
Increase in 1893		16
Number of teachers (including assistants)—		
Men—white, 703; colored, 189; total	892	
Women—white, 1,617; colored, 318; total	1,935	
Total		2,827
Increase in 1893 of	77	
Average number of months schools were open		8.8
Same as in 1892.		
Amount received from State school tax (white schools), free school fund, and academic donations	$351,236 53	
Increase in 1893		$10,592 73
Amount received from State school tax appropriated to colored schools	$92,331 95	
Decrease in 1893		$2,265 11
Amount received from county tax	$513,557 31	
Increase in 1893		$32,651 91
Amount paid for teachers' salaries	$808,658 18	
Increase in 1893		$3,702 65

Amount paid for building, repairing and furnishing school houses	$89,752 50	
Decrease in 1893		$22,780 57
Amount paid for books and stationery	$48,627 32	
Increase in 1893		$2,084 31
Amount paid for supervision and office expenses.	$40,641 92	
Increase in 1893		$2,223 63
Amount paid for incidental expenses, including fuel and rent	$63,827 64	
Increase in 1893		$6,315 47
Amount paid for interest	$4,929 69	
Decrease in 1893		$807 84
Amount paid for miscellaneous expenses	$14,049 33	
Decrease in 1893		$1,521 18
Amount of indebtedness paid	$41,118 14	
Increase in 1893		$22,783 05
Total expenses for the public school purposes in the counties	$1,111,604 72	
Increase in 1893		$11,999 52

The items of expenditure which show an increase are :

Teachers' salaries	$ 3,702 65	
Books and stationery	2,084 31	
Supervision and office expenses	2,223 63	
Incidental expenses, fuel and rent	6,315 47	
Indebtedness paid	22,783 05	
Total		$37,109 11

The items which show a decrease are :

Building, repairing and furnishing	$22,780 57	
Interest	807, 84	
Miscellaneous	1,521 18	
Total		$25,109 59
Showing a net increase of expenditure in 1893		$11,999 52

STATE TABLES.

STATE TABLES.

The State tables annexed present the usual summary of interesting facts.

Table "A" shows the population of Maryland by counties and the number of white and colored, according to the census of 1890.

Table "B" shows the population between 5 and 20, and the quarterly distribution of the State school tax to the white schools of the several counties and the City of Baltimore.

Table "C" shows the colored population between 5 and 20, and the quarterly distribution of the State school tax to colored schools of the several counties and the City of Baltimore.

Table "D" shows the assessed value of the property subject to taxation in the several counties, with the amounts, as "State School Tax," "Free School Fund," "Academic Fund," "Appropriation to Colored Schools" and "County School Tax."

Table "E" shows receipts from all sources, with the totals (including balances carried over).

Table "F" shows the expenditures of the several counties under the items of teachers' salaries, incidental expenses, books and stationery, building, repairing and furniture, supervision and office expenses, miscellaneous, interest, indebtedness paid, with the balance on hand and the totals.

Table "G" shows the number of pupils in the primary grades, and the number studying special branches.

Table "H" shows the number of schools in each county, the number of months schools were open, the

number of teachers, male and female, the number of different pupils, the average number of pupils enrolled and in attendance, and the highest number enrolled in one term.

Table "I" shows the cost of the colored schools and the statistics (under the same heads as those mentioned in Table "H") of the colored schools separately.

Table "K" shows the receipts from all sources for colored schools (including balance carried over).

Table "L" shows the expenditures for colored schools under the heads mentioned in Table "F."

Table "M" gives the statistics of the several colleges receiving State donations, and of the State Normal School.

Table "N" gives the statistics of the several schools and academies receiving State donations.

The county reports give in detail the enrollment and the average attendance for each term, and the expenses of each individual school, under the heads of rent, fuel, repairs, incidentals, furniture, blackboards and stoves, books and teachers' salaries. Every citizen can thus know what the school in his district has cost, and may become the auditor of the accounts. It is believed that no State in the Union furnishes a similarly minute detail of expenses.

Signed:

FRANK BROWN, GOVERNOR,
President.

WILLIAM DALE,
JAMES A. DIFFENBAUGH,
JOHN D. WORTHINGTON,
LOUIS L. BEATTY.

E. B. PRETTYMAN,
Secretary.

REPORT OF THE SECRETARY.

REPORT OF THE SECRETARY.

The summary included in the report of the State Board of Education, and the State tables immediately following, give a comprehensive view of the condition of the public schools during the last school year, ending July 31, 1893. The statistical reports of the Board of Commissioners of Public Schools of Baltimore city, and of the School Commissioners of the several counties of the State, present, in minute detail, the facts concerning the schools, and show the receipts and disbursements for their support. The statements of the several county examiners accompany the statistical reports.

A circular was sent by the Secretary to the Examiner of each county, requesting for publication in this report a supplementary report of the condition and needs of the public schools in his county.

The following replies have been received:

OFFICE OF THE BOARD OF SCHOOL COMMISSIONERS FOR FREDERICK COUNTY.

FREDERICK, MD., November 16, 1893.

Prof. E. B. Prettyman, Baltimore, Md.:

DEAR SIR—In reply to your communication of 13th inst., asking for a supplementary report, I would answer that I embodied in the annual report all that I deemed expedient to say at the time. The most pressing need at present, in my opinin, is a large increase of revenue in order to continue the schools four terms, to supply better furniture and equipments, and to pay better salaries to competent teachers.

Very truly yours,

EPHRIAM L. BOBLITZ.

HARFORD COUNTY.

John D. Worthington, Examiner:

Dear Sir—The statistical report herewith transmitted shows minutely the condition of the public schools of this county. The past year has been a more than ordinarily satisfactory one.

While the enrollment has increased somewhat, the average attendance, (which indicates much more plainly what the people think of their schools), has shown a gratifying increase, and the slow but steady increase of annual county levy shows that the taxpayers at large are satisfied with the disbursement of this portion of the public funds. I am pleased to add in this connection that a still further addition of over $1,400 was made to the fund at the last annual levy, and that both political parties in their late campaign endorsed this liberal support of the schools, which they feel belong to all citizens alike, irrespective of party.

I would not have it inferred, however, that we have not been struck by the financial cyclone which has so paralyzed business for the past eight months; the financial statement shows how we have been hampered by not receiving monies due from collectors; but we did not allow our disbursements to exceed our resources, and I am pleased to add that nearly all of back taxes have since been paid.

An unfortunate change in the law, making the time for appointment of trustees the 1st of August instead of the 1st of May, has been a serious drawback to their usefulness in recommending repairs to the school-houses, which should be made during the summer holidays, and in preventing the new Board from

deciding before school closes, the last of June, whether they wish to continue the same teacher another year or not. It is sincerely to be hoped that the old provision on this subject will be restored at the session of the Legislature soon to be convened.

Our course of instruction is thoroughly systematized from its beginning with the first grade to its ending with the ninth, and, we believe, is fairly well carried out in all the schools.

It is not claimed that the one hundred and odd schools of the county are alike thorough and efficient, but all of them have the same chance to be, and by regular annual meetings of our teachers for a week's session of their institute, by uniform examination questions issued by the Examiner, and by regular and repeated supervision their *uniformity* is ensured and a fair degree of *unity* secured. When the course has been completed a handsome diploma is issued to the graduates jointly by the School Board and the local authorities. These diplomas are eagerly contested for, both as a memento of early labors and as a measure of the victory gained; we believe that where the standing of the system is known they have an intrinsic value to the holders.

Many of the schools are actively engaged in supplementing the regular curriculum with such work as will help to make well-rounded citizens of our rising generation. Notably in this connection we would refer to the continued healthy growth of district libraries. Their value "goes without saying," for they not only greatly enrich the knowledge a child gets from his text-books, but by going into the homes of pupils they help to educate parents and keep them in touch with school interests. If we can only reach

the parents successfully there is little trouble in reaching their children.

More than half of our white schools now have their circulating libraries, some of which number several hundred well-selected books. An energetic teacher, who wants to, can always find a way to raise some money for school purposes. I recall one school in an agricultural community which last year raised $130 for district library, organ, maps, etc., and has already raised $60 this year.

The celebration of Columbus Day, too, was highly successful in bringing the public generally into closer touch with their schools, and in arousing a patriotic vim which I hope to see increase with every year. Probably fifty flags were floated from our school-houses that day for the first time, and now it is an unusual thing not to be able to tell that a Harford school is in session by the waving of its flag above the house.

There is still one class of pupils—those who enter school about the 1st of January and leave the middle or latter part of March—whose welfare causes the Board serious solicitude. They are generally large boys with little education, not used to the restraining influences of the school-room, and hence unwilling to submit to its head, who fit in with no grade, wish to take few studies, and, in fact, are only there because it is fashionable to, at least, enroll their names as students. They are apt to be a very disturbing element to the smooth running of a well-disciplined school, and it is very doubtful whether the harm they do does not exceed the good they receive. It is far better that the poor man should keep his children *regularly* in school until twelve or fourteen years of

age. During this period their young bodies are capable of doing very little work for him, while by going regularly to school they may acquire a clever common school education. They will then be ready to work to the advantage of both themselves and parents, and not feel compelled to lean against the school-house wall seeking a certificate of knowledge when their minds and tastes have gone too much to weeds to acquire it. Certain it is that in these days when a large majority of our teachers are females, these bummers should be robbed of the idea that valuable time in the school-room may be taken for police duty. While the school door should be wide open for all seeking good therein, it should be closed against any one who, having reached years of discretion, goes there intending to be troublesome and disorderly. Respectfully,

JOHN D. WORTHINGTON,
Examiner.

OFFICE OF THE SCHOOL BOARD.

DENTON, MD., November 15, 1893.

Hon. E. B. Prettyman, Secretary, &c.:

MY DEAR SIR—You will find herewith submitted our annual report for the fiscal and scholastic years ending July 31, 1893. By comparison it will be found that the enrollment and average attendance of pupils differ but slightly from similar statistics of our preceding report. When we consider the excellence of our school system, the fact that it has been in operation for more than a quarter of a century, and the untiring efforts to engraft it into public favor on the part of those officials who have been charged with its

administration, it is neither strange nor surprising that the increase in these statistics from year to year is small. There should be encouragement to everyone attached to the cause that the tabulated exhibit from time to time shows a small but steady and healthy increase along these lines.

During the year we have made some departures from the regular routine of supervision, the results of which deserve some brief comment. For several years we have been impressed with the necessity of bringing our school patrons into closer touch and sympathy with public school work. Changes, looking to greater efficiency, are constantly going on in the work of public instruction, concerning which the outside world is either ignorant or does not understand, and from this lack of knowledge there is prevalent a spirit of indifference which borders closely on opposition. In our opinion school interests suffer more from this condition than from all the arrayed enemies against our system combined, and it is imperative, when we consider how absolutely the control of our schools is in the hands of the people, that the public be made acquainted with every new feature of school work and properly educated as to its importance. With this object in view we instituted a series of public-school meetings in various districts of the county at the beginning of the year just closed, where we could meet our school patrons and discuss those questions which affect the welfare of public education. As a means for securing their attendance the teachers arranged a programme consisting of songs, recitations and essays, in which their children took part. One or more representatives of our School Board attended each meeting and talked of the relations of the people to the

public schools. Our own observation and the testimony of those teachers where meetings were held justify the belief that educational work has been stimulated by such a course, and much silent opposition has been turned into enthusiastic support.

Another new feature which appears to have brought our county schools into greater popular favor is our graduating system, the commencement exercises of which were held for the first time last June. We have outlined a course of study for our town academies, (we have no high schools in our county), embracing nine grades, corresponding to the work prescribed by the State Board of Education. The last year's work or ninth grade completes Elementary Algebra, Plane Geometry, Rhetoric, English Literature, General History, Botany, Natural Philosophy, and three books of Cæsar's "De Bello Gallico." Upon the completion of this course to the satisfaction of our County School Board, which is determined by an examination prescribed by the Board and supervised by at least one of its members, the ninth grade pupils from all the graded schools are graduated with appropriated exercises at the county seat, and are awarded diplomas by our Board. Our first graduating class consisted of fifteen members, representing four different schools. The many demonstrations of approval at the time stamped the popularity of the scheme so far as the public is concerned, and the increased number in the higher grades since the project was announced three years ago shows that it is the means of keeping our pupils in our schools a longer period, and must result in placing education on a higher plane.

Our teachers unanimously endorse the new departure as an important factor for elevating the standard

of school work. The interest in establishing district school libraries is still kept up among our schools. During the past two years not less than twenty new libraries have been started. There are but nine white schools in the county without school libraries. We estimate that not less than $800 has been spent for library books during the two years stated. During the year Friendship school-house was burnt, and a library of well assorted books was also destroyed. As an evidence of the appreciation in which the library was held by the patrons of the district, not less than $40 was raised for the purchase of new books before the new school house was completed. It is our purpose to have every school-house in the county adorned with a library of well selected books. If it be incumbent on the public schools to create a thirst for knowledge on the part of our pupils we are under obligations to furnish such means as will gratify and develop this desire, and we can do it in no better way than by supplying our pupils with readable books.

I made a greater number of school visits last school-year than ever before for a like period. It has been my custom heretofore to make two visits a year—one during the autumn months and the other in the spring. I became convinced that there was a class of pupils who attend school for a few months of the winter whom it had never been my privilege to meet at their respective schools; so I made an excursion of the schools during the winter months. I must confess that I was disappointed because of the great number who spend only the winter months at school and also at their meagre education. It is not creditable to our school system that so many pupils of this class leave

school so poorly equipped to assume the responsibilities of citizenship and meet the exigencies of ordinary life. Having provided comfortable school buildings and competent teachers that they may become educated, are we not under obligations to those taxpayers who defray the expenses of maintaining our schools, and who make this contribution that ignorance may be reduced to the lowest possible minimum, to not only bring children of school-age into our schools, but to keep them there until they receive a thorough knowledge of at least the three R's? Our success in attaining this end depends measurably upon our efforts as agents of the schools to have the advantages of a puplic school education well understood and appreciated by those who should be its patrons.

We fully appreciate, Prof. Prettyman, your kind interest in our county schools. For your several visits during the year, and the words of encouragement given us we are under many obligations, and sincerely hope that we will be favored by your presence on many subsequent occasions. I am,

Your obedient servant,

M. B. Stephens,
Secretary.

TALBOT COUNTY.

Alexander Chaplain, Examiner:

We submit herewith the Annual Report of the Public Schools of Talbot county for the year ending July 31st, 1893.

During the school year just closed our teachers, as a body, are to be commended for their faithfulness and earnestness in the discharge of their duties.

There yet remain, however, a few teachers whose ambition has apparently been satisfied in maintaining the ordinarily low standard of the self-satisfied and poorly-equipped class that fail to study either the subjects taught or the methods of outlining, correlating and presenting them. This number is smaller than in preceding years, and will continue to grow smaller under the influences operating to give higher and broader views of the work to be done, and of the teacher's proper part in accomplishing it.

TEACHERS' INSTITUTE.

Our Institute was opened on Monday, the 19th day of June, for three weeks; and still the time was too short to develop satisfactorily the work which we undertook.

The Teachers' Institute is the recognized great principal agent for elevating our schools; for this can be done only through elevating the teachers in professional skill and knowledge.

The instruction in *form study, drawing* and *color work* was continued from the point where we left it at the Institute of the preceding year, and was chiefly directed toward their application to primary NUMBER WORK, ELEMENTARY SCIENCE and LANGUAGE WORK. The instruction in ELEMENTARY PHYSICS was given on the *experiment, observation, conclusion method*, in a small laboratory, where the teachers worked with industry and enthusiasm. This is the ideal method of teaching young pupils, if, indeed, it is not the only profitable one. In the construction of simple apparatus for experiment work, the female teachers developed quite as much skill as the men, and in the working laboratory showed a broad and ready grasp

of the methods for keeping alive and developing both the EMPIRIC and SPECULATIVE INTEREST in children. The instruction in PSYCHOLOGY and METHODS of TEACHING divided education into three branches, viz.: GOVERNMENT, INSTRUCTION and DISCIPLINE. GOVERNMENT and DISCIPLINE, however, are so often confounded in the minds of teachers, that, to prevent confusion, I abandon the term discipline and substitute for it the term WILL-TRAINING. I also gave lectures upon the nature, development and direction in children of three of the six classes of interests, viz.: The EMPIRIC INTEREST, the SPECULATIVE INTEREST, and the ÆSTHETIC INTEREST.

Form-study and drawing for beginners follow each other in the order named; form-study being first, drawing being second. Form-study is prerequisite to drawing. Both are modes of expression for the child, and, together with color work, apart from the strictly practical sense-cultivation which they give, much may be done with them to assist the æsthetic and moral growth of the pupils. Through form-study alone can we properly develop and train the mathematical imagination and give accuracy and completeness to concepts of mathematical relations both in arithmetic and geometry. The proper approach to practical arithmetic and geometry is through form-study and geometric drawing. Too many of our teachers are satisfied with the usual method of teaching arithmetic, and imagine that the thing is done when the pupils know something of the processes and the grammar of this branch of study.

ELEMENTARY SCIENCE work, apart from its developing habits of observation and training the comparing and concluding faculties of the pupils, forms too a proper

basis for number-work with beginners, while the child at the same time, through his observations, experiences and comparisons, is gathering stores of knowledge upon which the teacher may freely draft in the course of instruction for *apperceiving concepts* and the assimilation of new facts and ideas. The *empiric interest* in young children is very active. It is the source of child curiosity, and through it the teacher holds the attention and enthusiasm of beginners. The *speculative interest* manifests itself later, but, for the unfolding and development of these two interests, teachers must learn how to present and instruct in elementary science.

School government, instruction and will-training, present to us the three functions of the teacher —*governor*, *teacher*, *trainer*. Failure in any of these departments exhibits to the Examiner the weakness of the school, and determines for us the character, worth and usefulness of the teacher. The end of instruction is culture—mental and moral culture; the production of virtue, and the object of will-training is to strengthen the character for the purposes of morality. The value of a man lies not in *knowledge*, but in *will*; and, in his function as a trainer, the teacher must not only study the *objective will* of the child and present the means for the development and growth of the *subjective will*, but he must also study the relation of the will to the intellect

Will-training shows itself in the habits of the child. The sum of one's habits, including their motives and force, make up his character. The teacher should never forget that he is a character-builder. In this respect we are training our pupils for the State and good citizenship. We have a right to expect

that the school shall train its pupils to the formation of good habits—habits of obedience, habits of honesty, habits of industry. These are regulative habits of life, and form the substratum of character. The teacher who fails to do this builds into his pupils a moral looseness that may, and not unfrequently does, wreck their future prospects.

NUMBER.

For such teachers as have grasped the scope of the instructions given them in *form-study*, *drawing* and *elementary science*, as a basis for number-work for beginners, and for such teachers as have studied the notes and outlines given them for higher number-work, the presentation of number has been marked by a careful observance of the logical processes of development, supplemented and enforced by the construction of problems from given conditions for the lower grades, and by the comparison of numbers, the statement of relations and the obtaining of results for the intermediate grades. Requiring a strict observance of the discovery and the statement of the relations of numbers in the problems for the higher grades, there is a noticeable improvement in the form of the written work during the year, and progress has been made in the development of the mathematical imagination by requiring pupils to illustrate statements and conditions in problems, and comparisons in fractions, by either geometric or free-hand drawing.

It must be confessed, however, that the weakest point in our schools is the teaching of arithmetic and the development and training of the mathematical imagination. Perhaps the chief cause for unsatisfactory results is the defective preparation of teachers

in this branch of study, and, consequently, inefficiency in the work of outlining and presenting it to both beginners and the intermediate grades. Even when the teacher is fairly prepared and grasps the conditions and scope of the work, there seems to be an almost universal inclination to escape from the drudgery of both the outlining and drill that are necessary to success; and many teachers fall easily into the habit of giving work in number for "busy work," which, without adequate inspection of the slates or papers, soon superinduces on the part of the pupils habits of carelessness and inattention, and the placing of figures without thought.

In following the text-books, our teachers treat some of the subjects in arithmetic in such a way as to make them wholly mechanical or algebraic. In percentage, for instance, it is not saying too much, I hope, when, notwithstanding the teaching of both text-book and tradition, we object to all rigid division into cases and to all working by formulas. There is nothing new in percentage to any pupil who understands fractions, and is familiar with the decimal system as applied to integers and to fractions. If a pupil is seriously troubled in percentage, either he has not mastered his previous work or he does not recognize in a new form what he has met before.

In order to emphasize it, allow me to repeat what was said in one of my former reports, "All along the line of number-teaching we have been using too much analysis and too little comparison." Professor Hardy, of Dartmouth College, speaks boldly, but truly, when he says, "Analysis is a labor-saving machine of the intellect, and, having once mastered its grammar, we manipulate signs as we could not notions. The mind

is relieved of effort by the conversion of a mental into a mechanical process."

READING.

The most noticeable feature in reading during the year is the improvement in readiness of the lower grades, and the improvement in enunciation and expression of the intermediate grades.

Before coming to school, the child has learned to express his thoughts by means of the hand and by oral speech. He uses the sentence, which is the unit of thought. It is important that children should learn from the first to read in sentences. This is important not only from the thought side, but also from the form side. The eye should not be trained to dwell upon each word. Perception should finally be so rapid that the mind is not conscious of the words or letters. The sequence should be sentence, word, letter.

If we try to fill the mind with words apart from ideas, we shall develop very little power in the process. The mechanical side of reading cannot be taught without the mental side. The beginner is taught to construct his own reading lessons, in script, from simple pictures given by the teacher. The reading of original matter as an aid to correct expression is the best, for by such reading, inflection and emphasis spring from the thought. Experience has demonstrated that children can learn to construct reading lessons as good in structure and verbal expression as that contained in any primer or first reader. Books should not be given to children till after they have acquired a written vocabulary of 300 words. Then the book should be used only for sight-reading, with no

previous preparation, only so far as they may have had these words on the board, for the teacher should look ahead and plan his work to cover such words as they will meet in the book.

GEOGRAPHY AND HISTORY.

No special prominence was given to these branches of study, and the general plan of work did not differ materially from that pursued during the preceding year. The teachers, however, have shown increased interest in the constructive work of these branches, and in collecting and preparing illustrative material for the purpose of supplementing and broadening the meagre statements of the text-books. But the disposition has been for teachers to escape the thoughtful study, supplementary reading, and school-room drudgery of outlining and properly presenting these branches. It goes without saying that history must be taught in the light of a certain knowledge of geography, but any attempt to correlate these two branches to any great extent would prove a failure. Geography has supplied important conditions to nations in former generations, under which they worked out their own particular ideas and forms of civilization. If history were merely the narration of events, possibly it might be shown that the particular form of the event was shaped by geography. But the event had a spirit and philosophy behind it which would have fitted it to some other geographical conditions.

No good text-book for teaching geography is so far to be found, hence the text-book is a very poor guide to the teaching of geography. Until we have some approach toward an ideal text-book, the conscientious teacher must endure the drudgery of outlin-

ing the work. The work of outlining for each recitation must have for its basis, of course, its object in the general plan of outline; it must give the line of preparation to be made by the pupils; but the most important part is the line of preparation to be made by the teacher. The study of maps, apart from the constructive work which ought to be done thoroughly, is well nigh worthless. In this department of geography, the best method for preparing the child to construct his geographical world is to make a careful study of types. One river system is very much like every other; so is one mountain chain like all mountain chains, one city like all cities. If the teacher selects that as a type which can be best illustrated by pictures, the mastery of each typical geographical element will enable the pupil to reproduce it in modified form in any part of the world where it may be found. In an ideal text-book on the subject of geography, this study of types should be made a prominent feature.

A COURSE OF STUDY.

While the teachers cannot be relieved from the study necessary for special preparation for each recitation in every branch of study, and the drudgery of special outlining in presenting their work, it would seem a reasonable and proper demand on their part that the general plan of outline should be prepared by the EXAMINER. The work in the several branches of study could be advanced, broadened and made more effective through this means, the teaching would become more systematic and definite, and there would be less waste of power through misdirected effort. While aiming to give unity and system in the work,

the outlines should be so flexible as to give the teacher freedom and opportunity for the exercise of individuality, which is an essential element in intelligent teaching. With a clear knowledge of what to do, on the part of the teachers, and a constantly increasing intelligence in doing it, the advancement of the schools would be normal, steady and constant.

OUR PUBLIC SCHOOL EXHIBIT AT THE COLUMBIAN EXPOSITION AND AT OUR COUNTY FAIR.

OUR PUBLIC SCHOOL EXHIBIT at the COLUMBIAN EXPOSITION was work from the first, second, third and fourth year grades only. It was placed in the Children's Building, under the charge and supervision of Committee Liberal Arts No. 21, Mrs. Robert B. Mitchell, Chairman, and Miss Frances S. Ives, Secretary. In their letter soliciting this contribution, they confined the exhibit within the limits of the primary grades. The EXHIBIT at our COUNTY FAIR, however, included work from all of the grades, primary, intermediate and high schools, as in preceding years.

The work was arranged by each teacher in two exactly duplicated sets. From one set was selected the EXHIBIT sent to Chicago, and the EXHIBIT for our COUNTY FAIR was selected from the other set. Each specimen of work was marked by the teachers as coming from a Rural School, Town School or High School, giving name and number of school, name of teacher and name, age and grade of pupil.

Our EXHIBIT at the COUNTY FAIR surpassed, in neatness of execution and in logical development of the scope of our school work, that of any former year. Separating our work in each branch of study into two classes, *constructive* and *descriptive*, the character of

the constructive work year after year clearly shows the educational value of drawing in our schools. Its effects upon the pupil's habits of mind in neatness, accuracy and taste is a matter that attracts the notice of all who year after year visit and study our exhibit. The constructive work re-enforces, too, the descriptive work in every branch of study. It cultivates a healthy productive imagination, and this is the foundation of all progress in instruction--the bed-rock upon which the teacher builds, if his work is to endure. It is only through the *imagination* that the pupil apprehends instruction. When this truth is fully understood and recognized, an important step forward will be made all along the line of our teaching.

The scheme for the work, from which the exhibit for the Columbian Exposition and our County Fair was drawn, was sent out in the month of January to be used instead of the usual intermediate examination papers for the schools annually given out at that date. The faithful, zealous and growing teachers of the county were enthusiastic over it. One teacher, who has been an earnest worker with me for twenty-five years, wrote, "Your SCHEME came as a revelation in school work. I shall do my best to teach on the lines therein suggested."

It may be of interest to you as State Superintendent of Public Instruction to inspect the scheme for some of the grades, beginning with the first year grade. It will at least give you a partial and suggestive view of the plan, nature and scope of the work that we are doing in our schools.

FIRST YEAR GRADE.

1. Constructive reading. Picture may be drawn by the teacher, and so marked. If the picture is drawn by the pupil, the teacher will so mark it. All such markings for drawings and explanations of written work must be done at the bottom.

a. The teacher will add to the constructive reading lesson, for the pupil, at the top, words and idioms previously taught, and that the pupil knows as a part of his reading vocabulary.

b. The reading lesson constructed by the pupil without the aid of words and idioms supplied, at the top, by the teacher.

c. The teacher will add to the constructive reading lesson, at the bottom, all words asked for by the pupil, and supplied by the teacher, during the construction of the reading lesson.

2. Illustrated Number Work. (Consult your Note Book of Number Work Outlines, also the Industrial Arithmetic).

3. Elementary Science. (Consult your Note Book of Elementary Science Outlines, given at your last Summer School and Institute).

4. Form Study. (Consult your Leaflets distributed at the Summer School held at St. Michaels).

SECOND YEAR GRADE.

Language.

1. Constructive reading lessons, using either drawings or pictures. Let the drawings be either simple, or simple complex.

a. Descriptive, illustrating idioms used in describing things.

b. Narrative, illustrating idioms used in this style of language work, where the imagination of the child is put to exercise.

2. Written exercises showing the proper use of "a" and "an," of singular and plural forms of nouns, of correct forms of verbs with singular and plural nouns, of the proper use of "this" and "that" and their plurals.

3. Lists of naturally associated groups of words; e. g., of days of the week, of months of the year, of domestic animals, of childish games, of natural scenery.

Number.

1. Illustrated Number-work.

2. Addition, Subtraction, Multiplication, Division, and Partition. Illustrated.

3. Number-work that takes its rise in Form-study.

Form-Study.

1. Constructive. By Paper Folding only. (Consult Leaflets).

2. Descriptive.

Elementary Science Work.

1. Constructive. (Consult your Note Book of Elementary Science Outline).

2. Descriptive.

THIRD YEAR GRADE.

Language.

1. Constructive Reading Lessons, as in second grade, but on more advanced lines.

2. Series of sentences dictated:
   a. Showing use of Period.
   b. Showing use of Interrogation Point.
   c. Showing use of Exclamation Point.
   d. Showing simplest uses of Comma.
   e. Showing use of Quotation Marks.
3. Reproduction Story:
   a. A brief story read by teacher.
   b. A brief story that the child has heard.
4. Picture (not too complex):
   a. Description.
   b. Narration.
5. Short narratives of childish experiences.
6. Short descriptions of Natural Scenery.
7. Comparisons of animals, trees, leaves, etc.
8. Letter Writing.

Number.

1. Addition, Subtraction, Multiplication, Division, and Partition. Illustrated.

2. Number-work that takes its rise in Form-study. (Consult your Industrial Arithmetic).

3. Number-work that takes its rise in Elementary Science Work.

4. Problems from conditions given by the teacher. (Consult your Note Book on Number-work).

5. Comparison. Introduce simple measures, such as foot measure, yard measure, pint measure, etc.

Geography.

1. Plans: Of the School-room; of the School and Playground; of a Garden, etc.

2. Outline Maps: of an Island, etc.

3. A short description of a Scene in the Country.

Form Study.

1. Constructive. (Consult Leaflets).
2. Descriptive.

Elementary Science Work.

1. Constructive. (Consult your Note Book of Elementary Science Outlines).

Descriptive.

FOURTH YEAR GRADE.

Language.

1. Series of sentences dictated:
   a. Showing use of Capitals.
   b. Showing use of Period, Abbreviation, Interrogation Point, Apostrophe, Comma as particularly indicated by teacher, Quotation Marks, etc.
2. Reproduction Story:
   a. Story read by teacher.
   b. Story that the child has heard or read.
3. Pictures, more complex than third year grade.
   a. Description.
   b. Narration.
4. Compositions on familiar childish experiences, narrative and descriptive, the subjects, occasions, objects being suggested or presented by the teacher.
5. Easy compositions on natural processes, such as changes of season and weather, rivers running, rivers running to the sea, movements of winds, stars, etc.
6. Series of sentences illustrating the four kinds of sentences, distinction of subject and predicate, of common and proper nouns, common and proper adjectives and indirect quotations.
7. Letter Writing, more formal than in previous grades.

Arithmetic.

1. Addition, Subtraction, Multiplication, Division, and Partition. Illustrated.

2. Problems from conditions.

3. Statements deduced from simple conditions of problem in concrete number given by teacher.

4. Problems from simple complex conditions given by teacher, pupils translating abstract numbers into concrete problems.

5. Comparison, as in third grade, but with numbers and measures a little more difficult.

Geography.

1. Lists of the Forms of Land. Illustrated.

2. Lists of the Forms of Water. Illustrated.

3. Lists of what the Earth affords for the use of man On its Land Surface.

4. Lists of what the earth affords for the use of man under its land surface.

5. Lists of what the water affords for the use of man.

6. Lists of specially useful plants, and where they are found.

7. Lists of specially useful animals, and where they are found.

8. Reproduced geography stories, from such books as "The Seven Little Sisters," etc.

9. Form-study of North America, etc.

a. Constructive.

b. Descriptive.

History.

1. Reproduced stories; *e. g.* The Discovery of America by Columbus; Captain John Smith, and Pocahontas; The Settlement of Maryland, etc.

2. Picture stories; *e. g.* Columbus and his Ships; The Costumes and Customs of the Indians; The Landing and Settlement of Maryland, etc. (The teacher can either make the drawing or use small picture.

Grammar.

1. Sentences given by teacher, and the Nouns, Adjectives, Verbs, arranged in columns, with proper headings, by pupil.
2. Lists of Nouns given by teacher, and put into sentences by pupil.
3. Lists of adjectives given by teacher, and put into sentences by pupil.
4. Lists of verbs given by teacher, and put into sentences by pupil.
5. Easy analysis of simple sentences.

Form Study.

1. Constructive (consult leaflets).
2. Descriptive.

Elementary Science Work.

1. Constructive, *e. g.*, castings of earth worms, etc.
2. Description of what was observed, *e. g.*, habits, doings, food, etc., of earth worms.
3. Reproduce, too, your work in September and October: observation, comparison and analysis of flowers, together with the constructive work in drawing and colors, description and comparison of leaves as to form, etc.

Reproduce, too, your observations, descriptions, comparisons, together with the constructive work in drawing and colors; in the months of September and October, birds, insects, tadpoles, etc.

FIFTH YEAR GRADE.

Language.

1. Same as in fourth grade, but on more advanced lines.

2. Picture Stories. Narration.

3. Dialogues:

a. From Pictures.

b. From Proverbs given as a title and the scene and characters suggested by the teacher.

4. Letter Writing; familiar, formal, and business letters.

5. Lists of all books read by pupil, as full as possible, giving first book read and all others with authors and full titles.

6. Lists of quotations, written, punctuated, etc., from memory.

Arithmetic.

1. Fractions. All fundamental operations as seen in folded paper or diagramed paper, viz.: Reduction, Addition, Subtraction, Multiplication, Division, Partition, and also Comparisons.

2. Problems in Fractions. Illustrated.

3. Problems in Measures. Illustrated.

4. Problems in complex concrete conditions given by teacher, illustrated, and colored if teacher requires it.

Grammar.

1. Graphic Analysis of Simple and Simple Complex Sentences.

2. Written analysis of Simple and Simple Complex Sentences, with Parsing.

Geography.

1. Constructive Geography.
2. Descriptive Geography.
3. Geography Stories, from Geography Pictures.
4. Maps and Diagrams showing Elementary Science Knowledge of pupils in this branch of study. (Consult Note Book on Elementary Science).
5. Written comparisons of a summer and a winter day at a place or city in the extreme south of the Temperate Zone.

Written comparisons of a summer and a winter day at a place or city in the extreme north of the Temperate Zone.

History.

1. Constructive History.
2. Descriptive History.
3. History Stories, from pictures showing costumes and customs of people.

Physiology.

1. Constructive Physiology.
2. Descriptive Physiology.

Form Study and Elementary Geometry.

1. Constructive form-study, by both Drawing and Paper Folding.
2. Descriptive form-study, *e.g.*, Write directions for folding the Rhombus into an Isosceles Triangle.

Write comparisons of the Rhombus with the Isosceles Triangle.

Find and write likenesses and differences.

Write lists of objects which you have found having a surface or surfaces like a Rhombus, and lists of objects which have a surface in the shape of an Isosceles Triangle.

3. Classification of Forms.
   a. Constructive, by drawings.
   b. Descriptive (condense descriptions as much as possible), comparisons of forms, etc.

Elementary Science.

1. Constructive, by both drawing and color work. (Copy or reproduce work in Botany and Zoology in months of September and October). Copy your tables of observation and records in Meteorology.

2. Descriptive. (Copy or reproduce descriptive work in Botany and Zoology in months of September and October). The oyster, food, etc.; prehension of food, what animals, beside man, with comparisons, etc.

Drawing.

1. The elementary beginnings of formal lessons in Drawing:
   a. From the Object.
   b. Simple Geometric.

SIXTH YEAR GRADE.

Language.

1. Same as in fifth year grade, but on more advanced lines.

2. Imaginative letters.
   a. To Queen Victoria; a missionary in Africa; China, etc.
   b. What will you do as teacher, lawyer, doctor, editor, etc., when grown.
   c. A Ghost Story. A dream.

3. Abstract from memory of stories read or told to the class.

4. Transposition, with outlines, of brief poems; descriptive and narrative.

5. Short descriptions of trees, compositions on metals, minerals, etc., with outlines.

6. Biographical and historical sketches with outlines, from History of United States.

Subjects: Arnold, the Traitor; General Winfield Scott; Perry's Victory; Winter at Valley Forge, etc.

7. Geographical Compositions: Niagara, the National Park, Maryland and California compared; the City of Chicago, from Easton to New York, etc.

8. List of quotations and poems learned; written and punctuated from memory.

9. Lists of books read this session. Abstracts of them.

History and Geography.

1. Maps, with written work when practicable:
   - *a*. Outline.
   - *b*. Relief.
   - *c*. Climatic.
   - *d*. Political.
   - *e*. Comparative.
   - *f*. Railway.
   - *g*. Race.
   - *h*. Rapid sketches.

   (Time limited).

2. Map of State, of county, of school grounds.

3. Illustrated compositions on geographical subjects, series of mounted pictures showing different phases and uses of land and water, people, occu-

pations, productions, (particularly of Maryland). Weather, and other observations taken daily.

4. Illustrated historical compositions: Sketches of monuments; San Augustine, Jamestown, the Landing of the Pilgrims, Washington at Annapolis, the Peggy Stewart, Mason and Dixon's Line. When pupil or teacher cannot make drawing, use small picture.

5. Topical outlines of different periods. Written recitations.

6. Routes taken by Columbus, the Cabots, Ponce de Leon, De Soto, with descriptions.

7. The Thirteen Original Colonies; the Louisiana Purchase; the Mexican Cession, etc.

8. Charts, or other devices, used in teaching geography or history.

Arithmetic.

1. More difficult problems in common fractions, showing (with special reference to partition and division) the analysis, operation, and written solution.

2. Problems from conditions given by teacher.

3. Synopsis of conditions contained in problems.

4. Bills, accounts, receipts, etc.

5. Notation, numeration, and reduction of decimals. Practical problems in addition, subtraction, multiplication, and division of decimals.

6. Short methods: Finding cost when price is an aliquot part of a dollar; finding quantity when cost is given and price is aliquot part of a dollar; finding cost when quantity and price of 100 or 1,000 are given; finding cost when quantity and price of ton (2,000 pounds) are given.

7. Tables of weights and measures from memory.

8. General work in compound numbers, (whole and fractional), illustrating when possible.

9. Longitude and time. Draw maps of hemispheres from memory, and locate places.

10. Carpeting, fencing, brick and stone work, shingling, etc. Illustrate.

11. Easy problems in proportion:
   a. By analysis.
   b. By cause and effect.

12. Calculation of simple interest at six per cent.

13. Drawing of negotiable note; finding the discount and proceeds at six per cent.

Geometry.

1. Diagrams and various lines, angles and figures, with definitions.

2. Easy problems:
   a. Partition of lines, angles and figures.
   b. Construction of simple figures under conditions.

Drawing.

1. Constructive:
   a. Working drawings of simple objects.

2. Representative:
   a. Objects as they appear.
   b. Freehand perspective of cylindrical and rectangular solids.
   c. Grouping.

3. Decorative:
   a. Geometric forms in ornament, borders, designs, etc.
   b. Conventionalising leaves, etc.

Grammar.

1. Outlines of topics by pupils (from memory).
2. Classification of sentences:
   a. Use.
   b. Form.
3. Classification of clauses:
   a. Principal.
   b. Dependent. { 1. Noun. { Subject. / Object. / Predicate. } / 2. Adjective. / 3. Adverb. }

4. Graphic Analysis of Complex and Compound sentences.

5. Devices to show Parsing.

6. Formation of words from given theme, as:

   a. Act. { Actor, one who acts. / Acting, continuing to act. / Action, the result or process of acting. / Actionable. / Active. / Actual. / Actuate. / etc. }

   b. With prefixes, as,
   Co-act,
   Counter-act,
   En-act,
   etc.

   c. With suffixes, as
   Pel (to drive). { Com-pel. / Re-pel. / Com-pulsion. / Re-pulse. / etc. }

Elementary Science.

1. Same as in 5th grade, but upon more advanced lines in both constructive and descriptive work.

2. Copy or reproduce work done in the months of September or October.

3. Drawings and descriptions of simple apparatus illustrating facts and phenomena in Physics, *e. g.*, Elasticity of Air, Pressure of Air, the Pump, the Siphon, etc.

4. Copy your tables of observation and records in Meteorology.

5. Drawings and descriptions in studies of Signal Service Maps, *e. g.*, Snow Line for the month of January; comparison of course of storms for the month of January, with preceding months; comparisons of rainfall and temperature for the months of December and January, as between the Atlantic slope and the Pacific slope, etc.

IN CONCLUSION.

Within the limits of this report to you, it would be impossible to review all of the work done in our schools, and it will be sufficient to say that it has been generally well done. The teachers, as a body, have shown the same comprehensive and intelligent grasp of the work in all branches of study that characterized the labors and efforts of last year. To their intelligent, conscientious and earnest efforts in giving effect to the plan of work provided for the schools, much of the credit for the advancement and progress which has been made must be given.

In closing, I wish to express to you my appreciation of your courtesy and kindness in our relations,

official and personal, and to express my obligation for your interest and cordial support in my plans and suggestions for advancing the efficiency of our teachers through our Teachers' Institute and Teachers' Association.

The following reports from State Colleges have also been received, viz:

WASHINGTON COLLEGE, CHESTERTOWN, MD.

To the State Board of Education:

The visitors and Governors of Washington College beg leave to report in accordance with the requirements of the Act of Assembly, that during the last scholastic year there were one hundred and nineteen students in attendance, three of whom were graduated creditably.

The eighteen county scholarships provided for under existing laws were all filled, in the main, with capable students, who received tuition, board, books and stationery free of charge; and five indigent scholars from Chestertown, in addition, have received free tuition. These scholarships are again all filled. Females were admitted to the college classes in September, 1891, and during the last scholastic year there were twenty female students who have proved excellent scholars.

The faculty has been increased by the addition of a female teacher, thoroughly educated, who gives special attention to the female students while assisting generally in the work of the faculty.

All the college buildings have been put in thorough order, and there are larger facilities than ever before

for the reception and instruction of the increasing number of students.

There is a general and lively interest in the college throughout the community and the surrounding counties, and with a revival of agricultural prosperity still greater accession of students is expected.

JOS. A. WICKES,
President.

JAMES A. PEARCE,
Secretary.

ST. JOHN'S COLLEGE,
ANNAPOLIS, MD., October 17, 1893.

Prof. E. B. Prettyman:

MY DEAR SIR—I beg leave to send you herewith the enclosed statement of the condition of the college. I think we have every reason to be satisfied with the fact that our numbers in attendance are greater than last year, in view of the general financial depression now prevailing. If it had not been for this, I feel sure our numbers would have been much more materially increased, and that the number of students in attendance would probably have advanced beyond two-hundred.

The Department of Natural Sciences at St. John's College has been recently divided into the distinct branches of chemistry, physics, botany and biology, and each department placed under the direction of a professor in sole charge. By this means a great development in the work of these departments is being brought about, and many valuable additions

have been made to the laboratories and their appliances.

The general work of the college is also in a highly prosperous condition, special attention having been directed to the growth and development of the department of English and English literature.

The gold medal offered by the president of the college, as a prize to be competed for by members of the junior class in oratory and elocution, has much stimulated the interest in this particular work with good effects.

I am, very truly yours,

THOMAS FELL.

ARBOR DAY.

This beautiful festival was again observed by the public schools in Maryland on the fourteenth day of April, 1893, in pursuance of the following:

PROCLAMATION BY THE GOVERNOR.

STATE OF MARYLAND,

EXECUTIVE DEPARTMENT.

As required by joint resolution number seven of the General Assembly of 1884, I do hereby designate Friday, the fourteenth day of April next, as Arbor Day, and recommend that it be observed by the people of the State, in conformity with the resolution, in planting trees, shrubs and vines, in the promotion of forest growth and culture, and in the adornment of public and private grounds and ways, and in such other way as may be in harmony with the character of the day so set apart.

I especially recommend to parents and teachers in public schools that they encourage their children, or those under their influence, to plant or transplant at least one forest or shade tree on that day by the side of some public road, or about their school houses or homes.

While the day is not a legal holiday, I hope the authorities will cause it to be observed in all the public schools, and teach an important lesson to the children in our State.

Given under my hand and the great seal of Maryland, at the city of Annapolis, on the 27th day of March, A.D. 1893.

[The Great Seal.]

By the Governor:

FRANK BROWN.

E. W. LECOMPTE, *Secretary of State.*

No rule has been enacted by the State Board of Education requiring reports upon the observance of Arbor Day from the several Boards of County School Commissioners; but the Secretary prepared and forwarded to each Examiner a blank form for a return of the planting of trees, shrubs, vines and flowers for publication in this report. Only seven returns have been received, which have been tabulated as follows:

PLANTED ON ARBOR DAY, APRIL 14, 1893.

Trees.	Allegany.	Caroline.	Carroll.	Frederick.	Kent.	Somerset.	St. Mary's.	Totals.
Silver Poplar	15				2			17
Pine	12		19	33	2			66
Elm	8				2			10
Maple	40	30	57	52		77		256
Kilmarnock	7							7
Cedar	15	30	12	6	16	23		102
Willow	12	30	3	10	13	22		90
Beech	10			1	2			13
Silver Maple	20			7	60			87
Catalpa	6							6
Poplar		30		8	4	10	1	53
Tree of Heaven	1							1
American Elm	20							20
Butternut	2							2
Hickory	4		6	1	1			12
Chestnut			4					4
Cherry			41	58	24		12	135
Apple	12		13		5		4	34
Peach			8	12	2		9	31
Pear			7	1	2		1	11
Plumb			4	3	3		9	19
Locust			35	18	11		11	75
Linden			5					5
Oak			1	3		3	1	8
Aspen			7					7
Ash			2	1	6	1		10
Walnut			2	2	1	3	2	10
Mahogany			1					1
Sycamore				4	2			6
Birch				1	2			3
Sweet Gum					1			1
Holly					1			1
Wild Cherry					7			7
Carolina Poplar					1			1
White Oak					2			2
Hemlock					1			1
Mulberry						1		1
Laurel						1		1
Magnolia						2		2
Gum						3		3
Hawthorn							1	1
Not named				302	53	49	96	500
Totals	184	120	227	523	226	195	147	1,622

A large number of shrubs, vines and flowers were also planted, and literary and musical exercises appropriate to the day were held in all the schools.

Many school-house lots are unfenced, and the destruction of trees, etc., by trespassing is discouraging. It is suggested that by the co-operation of trustees, teachers and the community every lot might be fenced.

It is reported that many trees planted in former years have died because of carelessness in planting, or want of knowledge of proper methods of planting. The list of books for school libraries recently published by the State Board of Education contains several cheap books on tree planting, a careful study of which should remove this difficulty, and would be interesting and profitable.

The following was the program at the State Normal School:

ARBOR DAY EXERCISES.

Maryland State Normal School,

Friday, April 14, 1893.

Exercises in the Main Hall.—10 a. m.

HYMN, - - - - - - - - School

I sing the Almighty power of God,
That made the mountains rise,
That spread the flowing seas abroad
And built the lofty skies.
I sing the wisdom that ordained
The sun to rule the day;
The moon shines full at His command
And all the stars obey.

I sing the goodness of the Lord,
That filled the earth with food;
He formed the creatures with His word
And then pronounced them good.
Lord! how Thy wonders are displayed,
Where'er I turn my eye;
If I survey the ground I tread,
Or gaze upon the sky.

There's not a plant or flower below,
But makes Thy glories known;
And clouds arise and tempests blow,
By order from Thy throne.
Creatures that borrow life from Thee
Are subject to Thy care;
There's not a place where we can flee,
But God is present there.

THE LORD'S PRAYER, - - - - - THE SCHOOL.

READING OF THE GOVERNOR'S PROCLAMATION,
BY PROF. HERBERT E. AUSTIN.

APPROPRIATE QUOTATIONS, - - - - SCHOOL.

KELLER'S AMERICAN HYMN—Words by Oliver Wendel Holmes, - SCHOOL.

Angel of Peace thou hast wandered too long!
Spread thy white wings to the sunshine of love:
Come while our voices are blended in song;
Fly to our ark like the storm-beaten dove.
Fly to our ark on the wings of the dove,
Speed o'er the far sounding billows of song.
Crowned with thine olive leaf garland of love,
Angel of Peace thou hast waited too long.

Brothers we meet on this altar of thine,
Mingling the gifts we have gathared for thee.
Sweet with the odors of myrtle and pine,
Breeze of the prairie and breath of the sea.
Meadow and mountain and forest and sea,
Sweet is the fragrance of myrtle and pine,
Sweeter the incense we offer to thee,
Brothers once more round this altar of thine.

Angels of Bethlehem answer the strain,
Hark! a new birth song is filling the sky;
Loud as the storm-wind that tumbles the main,
Bid the full breath of the organ reply,
Let the loud tempest of voices reply,
Roll its long surge like the earth-shaking main;
Swell the vast song till it mounts to the sky,
Angles of Bethlehem, echo the strain.

ADDRESS, - - - - - - - BERNARD C. STEINER, PH.D.

"THE OAK," - - - - - - - - - MISS PRICE.

(LAST STANZA BY THE SCHOOL.)

Lord! all Thy works are lessons; each contains
Some emblem of man's all-containing soul;
Shall he make fruitless all Thy glorious pains,
Delving within Thy grace an eyeless mole.
Make me the least of Thy Dodona-grove,
Cause me some message of Thy truth to bring,
Speak but a word through me, nor let Thy love,
Among my boughs disdain to perch and sing.

ASSOCIATIONS.

The State Teachers' Association did not hold its usual annual session.

The Executive Committee, after careful consideration and conference with all the officers of the association, deemed it best to postpone the meeting until July, 1894, in order that as many as possible of the members might visit the Columbian Exposition at Chicago.

The Association of School Commissioners of Maryland held its annual session in Baltimore, November 28th and 29th, 1893, President *pro. tem.*, Daniel C. Hudson in the chair, and Charles B. Rogers, Secretary

The committee on program appointed at the last meeting of the association presented the following:

PROGRAM.

1. Paper—"The Selection and Issue of Library Books in School Districts." H. G. Weimer, Cumberland.

Discussion.

Louis L. Beatty, - - - - - - - - - - Centreville.
Charles B. Rogers, - - - - - - - - - - Towson.
George Biddle, - - - - - - - - - - - Cecilton.
James A. Diffenbaugh, - - - - - - - - Westminster.
Calvin B. Taylor, - - - - - - - - - - Berlin.
Ephraim L. Boblitz, - - - - - - - - - Frederick.

General Discussion by the Association.

2. Paper—"The Appointment and Retention of Teachers in the Public Schools"—William E. Manmakee, Burnt Mills.

Discussion.

Dr. Arthur E. Sadler, - - - - - - - - Sadlersville.
Samuel Dutrow, - - - - - - - - - - Frederick.
Thomas A. Smith, - - - - - - - - - - Ridgely.
I. S. Wilson, - - - - - - - - - - Upper Marlboro.
Francis S. Everist, - - - - - - - - - Port Deposit.
William H. Shepherd, - - - - - - - - - Cumberland.

General Discussion by the Association.

3. Paper—"The Supply of Teachers for Colored Schools."—Alexander Chaplain, Easton.

Discussion.

John E. McCahan, - - - - - - - - - - Baltimore.
George W. Smith, Jr., - - - - - - - - - Hagerstown.
Dr. James L. Bryan, - - - - - - - - - - Cambridge.
Henry Wingate, - - - - - - - - - - - Chaptico.
John O. Freeny, - - - - - - - - - - - Salisbury.
Charles C. Bird, - - - - - - - - - Prince Frederick.

General Discussion by the Association.

4. "The Purchase and Distribution of Text Books."

Discussion.

John D. Worthington, - - - - - - - - - - Belair.
William H. Dashiell, - - - - - - - - - Princess Anne.
Thomas S. Stone, - - - - - - - - - - - Aquasco.
Eben F. Perkins, - - - - - - - - - - Chestertown.
Henry A. Wise, - - - - - - - - - - Baltimore.
M. B. Stephens, - - - - - - - - - - - Denton.

General Discussion by the Association.

5. Inspection of State Normal School, November 29, at 1 o'clock P.M.
6. Luncheon, November 29, at 2 o'clock P.M.

Cornelius J. Scott,
Samuel Dutrow,
William E. Mannakee,
Charles B. Rogers,
E. B. Prettyman,
Committee on Program.

The above program was substantially carried out. The following synopsis of the proceedings by a member of the association, Mr. J. S. Wilson, is taken from his newspaper, *The Marlboro' Gazette:*

"The annual meeting of the Association of School Commissioners of Maryland was held at the State Normal School on Tuesday and Wednesday, and, in the absence of President Cornelius J. Scott, of Galena, Kent county, Mr. Daniel C. Hudson, of Berlin, Wor-

cester county, acted as chairman, with Mr. Charles B. Rogers as secretary. A paper was read by Mr. H. G. Weimer, of Cumberland, on the 'Selection and Issue of Library Books in School Districts.' He showed the importance of school libraries and their necessity to proper education of the pupils. It was stated that the State Board of Education on Monday completed a list of 1,900 choice books, which will be published and sent to the counties, so as to assist in the choice of library books. This list is graded to suit primary, grammar and high schools, and the books are divided under proper heads, such as history, science, fiction, poetry, professional books for teachers, etc. Professor E. B. Prettyman thinks this list will be of great service in the selection of libraries, and will tend to elevate the tone of readers throughout the State. He spoke of the increased interest throughout the State in regard to school libraries. The question was discussed by Messrs. M. B. Stephens, E. B. Prettyman, Dr. James L. Bryan, John D. Worthington and E. L. Boblitz.

"Mr. William E. Mannakee, of Burnt Mills, Montgomery county, read a paper on 'The Appointment and Retention of Teachers in the Public Schools.' Mr. Manakee spoke of the trouble they had in the retention of teachers in Montgomery county. The trend of this discussion was whether it is best for the principals of schools to be appointed by district trustees, subject to confirmation by the board, as the law now stands. It was discussed by Messrs. Samuel Dutrow, E. B. Prettyman, H. G. Weimer and Eben F. Perkins. The general conclusion was that the law had better remain as it is.

"At the second day's session, during the discussion

of the 'Purchase and Distribution of Text Books,' the question of free school books was brought up, when it was shown that there was not a unanimous opinion in its favor. On the contrary, a resolution was offered by Examiner Hill, of Howard county, in opposition to free distribution of school books by the State. After considerable debate Mr. Hill's resolution was tabled by a vote of 19 to 8.

"'The Supply of Teachers for Colored Schools' was discussed by Mr. Alexander Chaplain, of Easton. In Talbot county, he thinks, the standard of colored teachers is not what it should be. Colored schools should be organized with white teachers, as he thought they were better fitted to train teachers, even though no better educated than the colored teachers. The school commissioners are forced to rely on the county schools for teachers, as the colored normal schools do not turn out enough to fill the demand. He thought an effort should be made to establish a central school in each county to train colored teachers. Dr. James L. Bryan, of Cambridge, said a few good words in behalf of colored teachers in his county.

"Charles B. Rogers, of Baltimore county, said: 'Our colored teachers are doing excellent work. I think it is best to have colored teachers for colored children, because they are capable of being more in sympathy with the scholars, and sympathy is a great thing to stimulate a scholar.' He stated that Baltimore county pays the same salaries to colored teachers that are paid to the whites, and in this fact, he thought, lies largely the success of Baltimore county colored teachers. Mr. H. G. Weimer, of Cumberland; Mr. Thomas S. Stone, of this county, and Mr. William H. Dashiell, of Somerset county, also discussed the question, favor-

ing in a general way the employment of colored teachers.

"A resolution offered by Mr. P. A. Witmer, of Hagerstown, was unanimously adopted. It provided that a committee be appointed to erect a monument over the grave of the late Professor M. A. Newell, in Greenmount Cemetery. Mr. Witmer eulogized Professor Newell as the father of the Normal School and an able worker for the establishment of the state school system. President John T. Morris, of the Baltimore City School Board, and the presidents of county boards, will constitute the committee, with Mr. Samuel Dutrow, of Frederick, as chairman. Mr. Witmer submitted memorial resolutions on the death of Professor Newell, and they were approved.

"After adjournment, on invitation of Professor E. B. Prettyman, the commissioners inspected all the departments of the Normal School. It was apparent that the constantly increasing attendance demands an addition to the building, which will be asked of the next legislature."

On motion of Mr. M. B. Stephens, Examiner of Caroline county, it was

Resolved, That it is the sense of this Association that no change is desirable in the law relating to district school libraries. We commend the action of the State Board of Education in publishing lists of books suitable for school libraries, and hope that these lists will be placed in the hands of County Examiners for distribution at an early date, believing that this action will make the present law successfully operative.

Mr. John E. Hill, Examiner of Howard county, offered the following resolution:

Resolved, That it is the sense of this Association that no State legislation in addition to provisions already on the statute books is desirable in regard to the purchase and distribution of school books.

On motion the above resolution was laid on the table.

Mr. Alexander Chaplain, Examiner of Talbot county, offered the following tribute to the memory of the late Prof. George L. Smith, which was read and adopted:

IN MEMORIAM.

Friday night, June 25, 1892, Prof. George La Tour Smith, of the Maryland State Normal School, returning to his wife and family, then in Canandaigua, New York, from his duty as lecturer before the Talbot County Teachers' Institute, was mortally injured in a railway collision at Harrisburg, Pennsylvania.

This sad news brought to the hearts of all who knew George La Tour Smith, and especially to Maryland teachers (his pupils and his brethren), a sorrow so deep, a grief so poignant, that its echoing throb will cease only when memory shall have passed within the unseen influences of the future's lifted veil.

> "His life was gentle; and the elements
> So mixed in him, that Nature might stand up
> And say to all the world, *This was a man.*"

Kindly and generous, gentle and tender, the soul of chivalry, the mirror of truth and honor, our hearts swell with every beat in eulogy of this devoted teacher.

His brilliant ability, his untiring energy, his peerless professional spirit, and great love for his work, not only had won him the universal esteem and ad-

miration of his fellow laborers, but also placed him in the front rank of teachers.

To the great cause of education his loss is measureless; to Maryland, irreparable; to her teachers, his life and work a light blazoning the pathway of unselfish and heroic endeavor.

Proud of the fame, won through the patient effort and earnest purpose of a gifted intellect, glorying in the noble example bequeathed to us, with hearts thrilling in tender recollection of our brother, "dead on the field of honor," and bowed in reverent memory of the gentle spirit now departed, we record our grief for him who has passed before us to the Master's work beyond, and extend the heartfelt sympathies of the members of this Association to the bereaved family and friends.

Resolved, That this tribute to the memory, character, worth, and ability of Prof. George La Tour Smith be spread upon the Journal of the Association of School Commissioners of the State of Maryland.

On motion of Dr. James L. Bryan the following committee was appointed by the Chair to prepare and report resolutions on the death of Professor M. A. Newell, viz.: Dr. James L. Bryan, Peter A. Witmer, F. S. Everist, Alexander Chaplain and Edward R. Goslin.

The committee presented the following report, which was adopted by a rising vote:

The committee appointed to prepare a memorial on the death of Professor M. A. Newell beg to report as follows:

IN MEMORIAM.

The Maryland Association of State School Commissioners desire to put upon record this memorial of the death of the late Prof. M. A. Newell, which took place at Havre de Grace, Maryland, on the fourteenth day of August, 1893.

Professor Newell was a member of this Association from its organization, and was identified with the very first effort to establish an uniform system of Free Public Education in this State.

Recognizing his absolute fitness for educational work, his intelligence, his culture, his admirable executive and administrative ability, he was for twenty-five years the head of the educational system of Maryland, with the approbation of those who controlled and directed that system.

This in itself should be and is the grandest tribute to his memory, but we, who were closely associated with him in his work, who knew him well and admired him, now proclaim his personal worth as a man, his genial disposition, his absolute fidelity to his friends and his spirit of self-sacrifice in their behalf.

Of his character and ability as an educator, it is enough to say that by his wise counsel he raised the Public Schools of Maryland to a plane which now defiantly challenges competition; that everywhere all over this country he was recognized as standing in the front rank of the defenders of public education, and that in any circle which met to discuss educational questions his voice was confessedly one of the most potential.

It is ordered that this minute be recorded, and that a copy be sent to Mrs. Newell by the Secretary of this Association.

James L. Bryan,
E. R. Goslin,
Alexander Chaplain,
P. A. Witmer,
F. S. Everist.

CONCLUSION.

The public schools of the State are in good condition and accessible to every child. The teachers are faithful and progressive. The school officers evince intelligent zeal in the performance of their duties. The citizens of the State exhibit each year a deeper devotion to the cause of public education. In a number of counties private schools have been entirely superseded by the excellence of the public schools.

It is not claimed that the system has reached perfection; but it is fearlessly asserted that those who are charged with the execution of the wise provisions of the school laws are working together harmoniously and conscientiously, and so as to merit and possess the confidence and approbation of the citizens of the State.

Discussions occur, and some differences of opinion exist as to some matters of detail in the administration of the school laws; but it is manifest that no ill feeling has been engendered, but that all are seeking to build up, sustain and advance the cause of public education.

In the opinion of those who have most carefully studied the public school system established by the General Assembly, in pursuance of the mandate of the Constitution, its fundamental principles are absolutely correct, no great changes are needed, and if amendments be made, conservative and not radical action should prevail.

These fundamental principles are: First, The public schools shall be *thorough, efficient and free throughout the State;* and secondly, "The law shall provide by taxation or otherwise for their maintenance."

It follows that all the children of school age throughout the State are *alike* the proper beneficiaries. The question is not in what city or county does the child live, but does he live in the State? Every child must share alike in the provision made for public education and is entitled to the same share of the State's money raised for this purpose. The underlying idea of any proper public school system is that the strong places shall help the weak. The State, to have good citizens, must educate its children. Our metropolitan city in this, as in every matter of common interest, must aid the less wealthy portions of the State, just as the cities and towns of the counties aid the rural sections. Equal benefit to each child is the only reason for the establishment of a State system. Take these great principles away and the State system is destroyed. Maintain them and the child of the suburb or of the wretched alley home is provided for exactly as that of the palace; the child of the county seat as the dweller in the mountain valley or on the island. Our public school system is against selfish, local interests, and in favor of *equality of opportunity* to every child of the State.

Did the State school tax provide *all* the money for public education, then as in some European nations, the State's officers would wholly execute the law. But beyond the partial provision by the State, the city of Baltimore and the several counties are required to supplement such provision. In school affairs we have, and should have, no financial unit less than a county. There is thus ample room afforded for local enterprise and for local school officers. Some counties have better school buildings, furniture and appliances than others. Some excel in school libraries. Some have better schools officers than others. The results are observed by the public, and intelligent public opinion can and should always demand change of whatever is not approved.

The system is commended to the General Assembly with confidence that, as the public debt diminishes and the State grows in financial ability, more liberal aid will be provided *by the State* for the education of all its children.

E. B. Prettyman,
Secretary.

SCHOOL COMMISSIONERS

—OF—

THE COUNTIES.

ALLEGANY COUNTY.

CUMBERLAND, MD.

PROF. E. B. PRETTYMAN:

Dear Sir: I have the honor to submit herewith the Annual Report for the year ending July 31st, 1893.

Very respectfully,

H. G. WEIMER, *Secretary.*

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1893.

	1893.	1892.
Number of school houses owned by the County, 94; rented, 3; total, 97	97	95
Number of rooms occupied when the attendance is largest	166	165
Number of male teachers (principals), white, 24; colored, 1; total, 25	25	25
Number of female teachers (principals), white, 70; colored, 2; total, 72	72	66
Number of female teachers (assistants), white, 78; colored, 1; total, 79	79	75
Total, white, 172; colored, 4; total, 176	176	166
Number of fenced lots	34	32
Number of schools having out-buildings	95	93
Number of schools having sufficient black-boards	95	92
Number of schools having good furniture	95	92
Number of terms schools were open—white, 3½, 8¾ months; colored, 3½, 8¾ months		
Number of different pupils for the year—white, 8,323; colored, 242; total, 8,565	8,565	8,371
Number of pupils in average attendance—white, 5,231; colored, 165; total, 5,396	5,396	4,625
Number of pupils over 16 years of age		178
Number of official school visits paid by examiner	173	

NUMBER OF PUPILS.

		Fall Term.		Winter Term.		Spring Term.		Summer Term.	
On Roll	white,	7,663	7,886	7,547	7,760	6,809	7,001	3,872	4,027

CHARLES COUNTY.

PROF. E. B. PRETTYMAN:

Dear Sir: In submitting to you my annual report for the fiscal year ending July 31, 1893, I am pleased to state that we were able to keep our schools open ten months the last year, notwithstanding a large decrease in the usual State appropriations. As we have on hand more than $1,600 to the credit of the white fund, and there is due the same fund the sum of two thousand six hundred and three dollars and twenty-three cents ($2,603.23), we have every reason to think we shall be able to keep our *white* schools open ten months the ensuing year; but, as we have on hand but a small amount to the credit of the colored fund, and are compelled to build a colored school-house, we shall be forced to close the *colored* schools for at least one month.

We have built two white school-houses—one in a vicinity which has needed it for some time, and the other near the site of an old school for which it was substituted. The latter was built with money appropriated by a special Act of the Legislature.

Our Teachers' Associations meet quarterly, are well attended, and are of great benefit to teachers.

Though this report shows but a slight increase in the enrollment of pupils and general average attendance over last year, yet it is sufficient to show that the interest of the people in the public schools is not waning. On the whole, we feel that our schools are doing good work, and our best efforts are directed toward improving them.

Very truly,

GEORGE W. BERRY, *Examiner.*

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1893.

	1893.	1892.
Number of school houses owned by the county, 69; rented, 1; total, 70	70	69
Frame, 69; brick, 0; log, 1; stone, 0; total, 70	70	69
Number of rooms occupied when the attendance is largest	70	69
Number of male teachers (principals), white, 16; colored, 4; total, 20	20	24
Number of female teachers (principals), white, 28; colored, 22; total, 50	50	45
Total, white, 44; colored, 26; total, 70	70	69
Number of fenced lots	2	2
Number of schools having outbuildings	8	7
Number of schools having sufficient blackboards	46	67
Number of schools having good furniture	53	50
Number of terms schools were open—white, 4, 10 months; colored, 4, 10 months		
Number of different pupils for the year—males—white, 730; colored, 762; total, 1,492; females—white, 630; colored, 832; total, 1,462	2,954	2,867
Number of pupils in average attendance—white, 636; colored, 602; total, 1,238	1,238	1,195
Number of pupils over 16 years of age—white, 55; colored, 82; total, 137	137	70
Number of official school visits paid by examiner	69	60

FREDERICK COUNTY.

PROF. E. B. PRETTYMAN:

Dear Sir—We herewith forward the Annual Report of the Public Schools of Frederick County for the year ending July 31, 1893. It is a source of regret that diminished revenues and necessary increase of expenditure prevented us from keeping the schools open for more than three terms, as against three and two-fifths terms the preceding three years. It is to be hoped that the Commission appointed by the Governor to investigate the method of distributing the State school fund under the present law may recommend, and the Legislature enact a law, a measure that will provide for a more equitable distribution of the school fund than is made under the law in force at present. The report of the enrollment and attendance of pupils will show that notwithstanding the fact that the schools were closed one month earlier than for several years past, the total enrollment, as well as the average attendance, exceeded that of the preceding year.

Very truly yours,

SAMUEL DUTROW, *President.*
EPHRAIM L. BOBLITZ. *Secretary.*

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1893.

	1893.	1892.
Number of school houses owned by the county, 158; rented, 13; total, 171	191	167
Frame, 62; brick, 66; log, 14; stone, 16	68	68

KENT COUNTY.

PROF. E. B. PRETTYMAN, *Secty. State Board of Education:*

The annual statistical report of the School Commissioners for Kent county is herewith submitted:

The amount paid School Commissioners during the year being $363.40. Of this amount, the sum of $63.40 is the balance due and paid the old Board, which went out of office August 1, 1892, under the Act of 1892.

Five of the colored schools, one in each election district, were kept open the entire four terms, the remainder were kept open three and five-elevenths terms.

During the school year, the school building at Millington was destroyed by fire, but temporary quarters were secured, and the exercises were only interrupted for a few days. Substantial buildings have been erected, but are not properly included in this report.

Attention is again called to the inconvenience of having the Trustees of the schools appointed during August, in the very middle of the vacation.

The Teachers' Association held the regular five meetings during the year, one of which was attended by the Principal of the State Normal School, who introduced and explained the "French method" of examination.

EBEN F. PERKINS, *Secretary.*

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1893.

	1893.	1892.
Number of school houses owned by the county, 51; rented, 1; occupied, 12; total, 64	64	64
Frame, 61; brick, 3; log, 0; stone, 0; total, 64	64	64
Number of rooms occupied when the attendance is largest	81	80
Number of male teachers (principals), white, 12; colored, 7; total, 19	19	
Number of female teachers (principals), white, 32; colored, 11; total, 43	43	
Number of male teachers (assistants), white, 0; colored, 1	1	
Number of female teachers (assistants), white, 18; colored, 0.	18	
Total, white, 62; colored, 19; total, 81	81	80
Number of fenced lots	30	30
Number of schools having outbuildings	52	51
Number of schools having sufficient blackboards	58	58
Number of schools having good furniture	51	51
Number of terms schools were open—white, 4, 10 months; colored, five, 4 terms; others 3 5-11 terms, 8½ months		
Number of different pupils for the year—males—white, 1,200; colored, 737; total, 1,937; females—white, 1,066; colored, 580; total, 1,646	3,583	3,543
Number of pupils in average attendance—white, 1,221; colored, 483; total, 1,704	1,704	1,680
Number of pupils over 16 years of age—white, 119; colored, 117; total, 236	236	258
Number of official school visits paid by examiner	143	154

Number of Pupils.

Deed for school lot	21 00	
Balance cash on hand July 31, 1893	2,045 27	
		$12,105 63

QUEEN ANNE'S COUNTY.

Prof. E. B. Prettyman,

Secretary State Board of Education:

Dear Sir—I herewith submit my report of the public schools of Queen Anne's County, Md., for the year ending July 31, 1893.

Owing to the prevalence of Scarlet fever, Measles and Diphtheria, the general average of attendance is less than last year. The scarcity of money has prevented the building of several contemplated new houses. The teachers are alive to the interests of the schools and doing good work. We hope to make greater progress in every line during the next school year.

Very truly yours.

Louis L. Beatty, *Examiner.*

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1893.

	1893.	1892.
Number of School Houses owned by the County, white, 52; colored, 16	68	64
Frame, 64; log, 4; total, 68	68	64
Number of rooms occupied when the attendance is largest	86	85
Number of male teachers (principals), white, 18; colored, 10; total, 28	28	
Number of female teachers (principals), white, 35; colored, 10; total, 45		
Number of male teachers (assistants), white, 1; colored, 0; total, 1	1	
Number of female teachers (assistants), white, 12; colored, 0; total, 12	12	
Total, white, 66; colored, 20; total, 86	86	85
Number of fenced lots	36	
Number of schools having out-buildings	75	71
Number of schools having sufficient blackboards	86	79
Number of schools having good furniture	82	79
Number of terms schools were open—white, 4, 10 months; colored, 3, 7½ months		
Number different pupils for the year—males—white, 1,544; colored, 732; total, 2,276; females—white, 1,343; colored, 545; total, 1,888	4,164	4,158
Number pupils in average attendance—white, 1,318; colored, 466; total, 1,784	1,784	1,845
Number of pupils over sixteen years of age—white, 199; colored, 104; total, 303	303	299
Number of official school visits paid by examiner	179	179

NUMBER OF PUPILS.

APPENDIX.

EXTRACTS FROM THE BY-LAWS

—OF THE—

STATE BOARD OF EDUCATION.

The following classification and schedule of studies shall be observed in all Primary Schools, and in those classes of graded and High Schools to which they are applicable:

First Grade.

1. Reading and spelling from Chart or Blackboard; reading or spelling Primer, or First Reader. 2. Writing capitals and small letters from copies on blackboard. 3. Counting objects. 4. Writing figures as far as 100. 5. Adding, subtracting, multiplying and dividing by 2, 3, 4, orally, and by written work. 6. *Drawing.* 7. *Object lessons.* 8. *Singing.*

Second.

1. Reading and spelling to the end of Second Reader. 2. Writing words and sentences from blackboard and from Second Reader. 3. Writing and reading figures as far as 1,000. 4. Adding, subtracting, multiplying and dividing by 5, 6, 7, 8, 9. Mental arithmetic. 5. *Drawing.* 6. *Object lessons.* 7. *Singing.*

Third.

1. Reading and spelling to the end of Third Reader. 2. Copying on slates the lessons of the Reader, and exercises in Dictation. 3. Spelling, one-half of Primary Spelling-Book. 4. Writing and reading figures as far as millions. 5. Addition, subtraction, multiplication and long and short division. Mental Arithmetic. 6. Writing in Copy-Book, Nos. 1 and 2. 7. Language lessons begun. 8. Oral lessons in Geography, including the Maps of Maryland and the United States. 9. *Drawing.* 10. *Object lessons.* 11. *Singing.*

Fourth.

1. Reading and spelling to the end of Fourth Reader. 2. Primary Spelling-Book completed. 3. Copying of lessons in Fourth Reader. Reading from slates the lessons copied; Dictation and reproduction exercises. 4. Elementary Arithmetic, through Fractions. Mental arithmetic. 5. Writing—Copy-Book, Nos. 3 and 4. 6. Primary Geography, with Oral lessons and Map Drawing. 7. Language lessons continued. 8. *Drawing.* 9. *Object lessons.* 10. *Singing.*

Fifth.

1. Reading and spelling, Fifth Reader, alternate with History of Maryland and of the United States. 2. Writing lessons in Fifth Reader from Dictation. 3. Spelling—Advanced Spelling-Book. 4. Arithmetic, 2nd

☞ Subjects in *italics* are recommended, but are not obligatory.

book completed. Mental Arithmetic. 5. Writing—Copy-Book No. 5. 6. Language lessons continued, with Composition and Letter Writing. 7. Grammar—Parsing and Analysis of easy sentences. 8. Advanced Geography. 9. Elementary Physiology. 10. *Drawing*. 11. *Singing*. 12. *Needle-work* and *Domestic Economy* (for girls). 13. *Elements of Agriculture*, when ordered.

Sixth.

1. Reading and spelling to end of Fifth Reader, alternate with History of Maryland and of the United States. 2. Spelling—Advanced Spelling-Book completed. 3. Practical Arithmetic completed. Mental Arithmetic. 4. Writing—Copy-Book No. 6. 5. Advanced Grammar. 6. Geography completed. 7. Lessons in Composition and Letter Writing. 8. Physiology completed. 9. *Drawing*. 10. *Singing*. 11. *Needle-work* and *Domestic Economy* (for girls). 12. *Elements of Agriculture*.

Time Table.

Each grade may have four daily recitations, as follows:

1st.	1 lesson of 15 minutes and 3 of 10 minutes each				—45	minutes.
2d.	"	"	"	"	—45	"
3d.	"	"	"	"	—45	"
4th.	2 lessons of 15 minutes each and 2 of 10 each				—50	"
5th.	"	"	"	"	—50	"
6th.	1 lesson of 20 minutes and 3 of 15 minutes each				—65	"

The available portion of the remaining hour, and the time that may be gained by the absence of all pupils in any grade, may be spent in general exercises, or in studies above sixth grade, when there are pupils sufficiently advanced.

High Schools.

8. The High School course shall begin with the completion of the sixth grade, and may include all the studies required for admission into the Freshmen class at college.

9. No school shall be classed as a High School unless it contains at least two grades higher than the sixth.

10. The following schedule of studies is recommended for adoption in the High Schools and the higher classes of graded schools.

Seventh.

1. Arithmetic reviewed. 2. Algebra (Wentworth's or Robinson's) through Equations of the first degree. 3. Geometry (two books of Wentworth, or an equivalent)—Geometrical Drawing. 4. Physical Geography. 5. English Grammar—Morris's "Elementary Lessons"—Parsing and Analysis of "Paradise Lost," Book I. 6. Practical exercises in Composition. 7. English History—Green's "Short History." 8. Latin Grammar and Reader. 9. Book-keeping. 10. Physiology—(Martin's Human Body).

Eighth.

1. Algebra through Equations of the second degree, and Progressions. 2. Geometry, Plane and Solid, completed. 3. Natural Philosophy. 4. Rhetoric. 5. Modern History. 6. Latin—Cæsar "De Bello Gallico," three books. 7. Physiology completed.

Ninth.

1. Plane Trigonometry and Surveying. 2. Chemistry. 3. Botany. 4. Ancient History. 5. English Literature (Shaw's). 6. English Language (Lounsbury). 7. Elocution. 8. Latin—Virgil's Æneid, four books; Sallust—"The Conspiracy of Catiline."

Board of County School Commissioners.

FEBRUARY 1st, 1894.

ALLEGANY COUNTY.

H. G. Weimer, *Secretary* ..... Cumberland.

ANNE ARUNDEL COUNTY.

Dr. Harry M. Revell, *President* ..... Arnolds.
John T. Jeffreys ..... Jessups.
John T. Hutchins ..... Friendship.
John C. Bannon, *Secretary* ..... Annapolis.

BALTIMORE COUNTY.

Samuel M. Rankin, *President* ..... Long Green.
John S. Wilson ..... Catonsville.
B. Frank Jordan ..... Trump.
William T. Cox ..... Howardville.
N. Bosley Merryman ..... Shawan.
John P. Clark ..... Calvert and Lexington Streets, Baltimore.
Charles B. Rogers, *Secretary* ..... Towson.
Townley R. Wolfe, *Ass't Secretary* ..... Towson.

CALVERT COUNTY.

J. Brooke Bond, *President* ..... Mutual.
Dr. John F. Ireland ..... Lower Marlborough.
William T. Robinson ..... Prince Frederick.
Charles C. Bird, *Secretary* ..... Prince Frederick.

CAROLINE COUNTY.

Edward R. Goslin, *President* ..... Federalsburg.
John F. Dawson ..... Greensborough.
Henry C. Fisher ..... Denton.
M. B. Stephens, *Secretary* ..... Denton.

CARROLL COUNTY.

E. O. Grimes, *President* ..... Westminster.
L. P. Slingluff ..... New Windsor.

Jacob H. Blocher ..... Alesia.
E. M. Anderson ..... Mount Airy.
David Prugh ..... Freedom.
Dr. William Reindollar ..... Taneytown.
James A. Diffenbaugh, *Secretary* ..... Westminster.
Orlando Reese, *Ass't Secretary* ..... Westminster.

CECIL COUNTY.

Francis S. Everist, *President* ..... Port Deposit.
Jesse A. Kirk ..... Rising Sun.
George R. Ash ..... Elkton.
George Biddle, *Secretary* ..... Cecilton.

CHARLES COUNTY.

Dr. William I. Boarman, *President* ..... Bryantown.
Dr. William R. Barker ..... Newport.
J. Thomas Halley ..... Pomonkey.
G. Worthington Berry, *Secretary* ..... La Plata.

DORCHESTER COUNTY.

George W. Woolford, *President* ..... Cambridge.
James M. Robertson ..... Vienna.
Irving M. Langrell ..... Todville.
Dr. James L. Bryan, *Secretary* ..... Cambridge

FREDERICK COUNTY.

Samuel Dutrow, *President* ..... Frederick.
George W. Devilbiss ..... Woodsborough.
William H. Lakin ..... Lander.
Joseph B. Brown ..... Lantz.
Ezra R. Zimmerman ..... Emmitsburg.
David D. Thomas ..... Licksville.
Ephraim L. Boblitz, *Secretary* ..... Frederick.

GARRETT COUNTY.

George W. Merrill, *President* ..... Oakland.
Samuel C. Hoye ..... Deer Park.
C. N. Friend ..... Friendville.
William Hinebaugh, *Secretary* ..... Oakland.

HARFORD COUNTY.

William H. Harlan, *President* ..... Belair.
Dr. Martin L. Jarrett ..... Jarrettsville.
Dr. Daniel W. Hopkins ..... Havre de Grace.
John D. Worthington, *Secretary* ..... Belair.

HOWARD COUNTY.

Robert A. Dobbin, *President*.....Saint Denis.
John T. Hardy.....Clarksville.
Dr. John W. Hebb.....West Friendship.
John E. Hill, *Secretary*.....Ellicott City.

KENT COUNTY.

Richard W. Jones, *President*.....Rock Hall.
George W. Davis.....Still Pond.
Cornelius J. Scott.....Galena.
Eben F. Perkins, *Secretary*.....Chestertown.

MONTGOMERY COUNTY.

John H. Gassaway, *President*.....Germantown.
Thomas J. Holland.....Brookeville.
William E. Mannakee.....Burnt Mills.
John J. Higgins, *Secretary*.....Rockville.

PRINCE GEORGE'S COUNTY.

Dr. William W. Duvall, *President*.....Bowie.
Ignatius S. Wilson.....Upper Marlborough.
H. Harrison Sasscer.....North Keys.
Thomas S. Stone, *Secretary*.....Aquasco.

QUEEN ANNE'S COUNTY.

Dr. Joseph A. Holton, *President*.....Centreville.
Dr. Arthur E. Sudler.....Sudlersville.
Dr. William Denny.....Kent Island.
Louis L. Beatty, *Secretary*.....Centreville.

ST. MARY'S COUNTY.

Joseph H. Key, *President*.....Leonardtown.
Ignatius E. Mattingly.....Milestown.
J. Frank Bohanan.....Park Hall.
Henry Wingate, *Secretary*.....Chaptico.

SOMERSET COUNTY.

Dr. Gordan T. Atkinson, *President*.....Crisfield.
William E. Jones.....Widgeon.
Ephraim G. Polk.....Princess Anne.
William H. Dashiell, *Secretary*.....Princess Anne.

TALBOT COUNTY.

Dr. Edward M. Hardcastle, *President*.....Trappe.
